

HTC Aria

It's got everything you'd expect from the Internet. And with HTC Sense™, the Android™ 2.1 OS and 50,000 apps to choose from, it goes beyond every expectation of a pocket-sized phone. App it up. With the Android 2.1 operating system and instant access to the Android Market™, there's never a short supply of cool new ways to use your phone. With HTC's FriendStream app, you know what's going on with your friends on Facebook® and Twitter™, without actually going on Facebook and Twitter. The office has left the building. With Visual Mail, emails are presented like a stack of paper on your desk—you can flip through, read what you want and discard what you don't. With all of this and the nation's fastest 3G network, HTC and AT&T keep you connected!
