

Samsung Strive

The Samsung Strive™ is a stylish slider phone that lets you text a bunch of your friends at the same time. Keep everybody on the same page – even if you're all scattered across the country. Create groups of your fellow texters and exchange messages with one and all simultaneously. Texts will show up as “chat-style” threaded messages for easy conversational reading. With its slide-out QWERTY keyboard, threaded text and social messaging, it sets the standard that other messaging phones strive for.
